

Choosing a flood proof light fuel oil pump system? **THE SOLUTION IS HERE**

COMPLETELY SUBMERSIBLE SYSTEM WITH ENGINEERED SEAL BRACKET (ESB) TECHNOLOGY

- More affordable installation, requiring nothing beyond typical pump replacement
- Can be used with commercially available motors and most commonly used fuel oil pumps
- Installation requires no more space than your existing installation, no large enclosures or tanks
- No complicated or cumbersome enclosures, easy for retrofit installations

ISO 9001 Certified through SK Systems, a Division of Geiger
